

New internship

Sustainability department in Virum
Job posting for students attending PRE-PAIR 2023

Intelligent pharma facilities

NNE are experts in end-to-end pharma engineering and our success is built on our relationships, both with our colleagues and our customers. If you want to work on projects shaping the future of sustainable and intelligent pharma facilities, NNE is the place to be.

Join NNE - join the passion

We are currently looking for an intern to join our Sustainability department in the *spring and autumn period of 2024*. You will primarily work from our office in Virum.

As an intern in the Sustainability department, you will collaborate with experienced colleagues from diverse backgrounds. Despite being a small unit, you will always have access to support for your learning and growth.

We provide a dynamic project environment that prioritizes sustainability, empowering you to continuously expand your skills and embrace innovative approaches within sustainability.

Will you help us drive the sustainability agenda forward?

As an intern

You'll be working in projects where you for example could work with:

- Energy and water mapping in existing and future facilities
- Energy optimization of buildings, process equipment and utility systems
- Building simulation in software such as IES-VE and HEAT2
- LCA investigations in LCAbyg, SigmaPro, ecoinvent
- Communication material such as power point and posters.

You as a person

At NNE, we care about who you are as a person. Ultimately, how you work and your energy is what impacts the work we do as a team. As a person, you are:

- Able to work in both detailed level and in very early project phases.
- Passionate about sustainability and are eager to learn.
- Positive and can see solutions in complex challenges.
- Able to collaborate and contribute on projects with many stakeholders.
