

Alfa Laval in Copenhagen is looking for 2

Mechanical Engineer Interns

At Alfa Laval, we always go that extra mile to overcome the toughest challenges. Our driving force is to accelerate success for our customers, people and planet. You can only achieve that by having dedicated people with a curious mind. Curiosity is the spark behind great ideas. And great ideas drive progress.

As a member of our team, you thrive in a truly diverse and inclusive workplace based on care and empowerment. You are here to make a difference. Constantly building bridges to the future with sustainable solutions that have an impact on our planet's most urgent problems. Making the world a better place. Every day.

We can offer you

A learning experience in a dynamic and international company.
You will be challenged and develop your professional and personal skills.
A great work environment and the possibility of future cooperation

Key Tasks:

- 2D and 3D modeling in Autodesk Inventor
- Assist the Mechanical and Project Management Team with ad-hoc tasks, including documentation, P&IDs, manuals, and certificates.
- Equipment and process developments
- Re-design and testing of existing products.

The workplace will be Alfa Laval Copenhagen A/S.
Expected 37 hours per week.

Paid Internship.

What you know

You are studying mechanical engineering and are interested in working within different industries.
You are technically curious and inspired to learn practical knowledge. The work requires that you communicate fluently in written and spoken English.
