

.NET Software Developer with passion for industrial applications

Are you motivated by working with cutting edge software technologies? Do you have a passion for engineering fields of process automation and control? Then you may be one of our future developers joining FLSmidth's Software Technology Centre in Valby. We are working intensively on one of the greatest software projects in our history, based on the Microsoft .NET platform. This involves the transition into a new paradigm which will open the door to a world of new opportunities. Our department develops advanced software for process monitoring, control and laboratory automation solutions for the cement and minerals industry worldwide. As our new colleague you will contribute to an innovative environment where our objective is to develop a value added and competitive suite of software products to benefit our customers around world.

Take our suite of successful software products into the future

In close cooperation with your colleagues, you will develop advanced software applications which build on leading edge Microsoft technologies. You will be involved in all phases - including analyses, design, programming and final testing.

- You will play a key role in communicating to our internal stakeholders to identify and understand requirements.
- You will transfer the understanding to an efficient design in cooperation with other software developers, and implement the solution based on Agile planning framework.
- As a part of your team, you will also join the test process of the software, all the way from unit testing to live operation on site.
- You will work in an international environment with highly motivated and dedicated colleagues in a job which you will have the opportunity to influence greatly.

Team player and solid experience in Microsoft .NET technologies

You have an engineering background within software/electronic/process field, and solid experience in Microsoft .NET technologies, implementation and quality

assurance. You have as a minimum in-depth knowledge within **C#, WCF and SQL server**. Experience within WPF and Team Foundations Server environment will also be advantage, but not mandatory. On the personal level, you are known for your solution-oriented approach to your tasks, and you thrive on being part of a team, as well going across teams where you can unfold your innovative ideas. Last but not least, you must have solid communication skills and a high level of English proficiency.

Your source to the good working life

As an FLSmidth employee, you will enjoy a wide range of benefits, including individual training and further education, an attractive salary package with good holiday and maternity/paternity options, a solid pension and insurance plan, massage, chiropractics and physiotherapy, access to holiday cottages, a good senior programme and much more - plus you can buy meals to take home from work.

Questions about the position may be directed to Hassan Yazdi +45 3093 2896, or Bodil Recke +45 3093 2755.

FLSmidth is an international engineering company with an annual turnover of EUR 3.1 bn. We are the world's leading supplier of plants, machinery, services and spare parts to the cement and minerals industry. To maintain our market leading position, we invest massively in technological innovation, R&D and training of our more than 10,700 employees worldwide.
